

June 11, 1965

Gentlemen:

[redacted] is pleased to forward its proposal entitled "Feasibility Study, Water Effluents Identification."

25X1

The statement of the problem and the technical approach to the possible solutions are outlined in considerable detail in the technical proposal.

Because of the nature of the effort we believe that a cost-plus-fixed-fee contract would be the most equitable for both parties.

You will note that the program has been clearly segregated into two (2) parts, designated Phase I and Phase II. At this time we are recommending that only Phase I be embarked upon. This phase could be completed in approximately eight (8) months at an estimated cost of [redacted]. We would like to point out that our estimate includes only approximately [redacted] for Task I-6, as at this time we cannot accurately predict what outside field and laboratory facilities will be recommended for use. Based upon previous experience we feel that in all probability a minimal facility will be adequate, but in the event that a more complex facility was mutually agreed upon, then additional funding might be necessary for this particular task.

25X1

We would like to emphasize that Phase I is a separate effort, fully independent of Phase II. The results of Phase I in the form of a final report will provide the technical information required to proceed to Phase II.

We believe that the periods of time set forth for the two (2) phases are realistic, and probably represent the most economical application of the funding. Of course, the promised completion dates are contingent upon timely receipt of the Government furnished materials and assistance that are referenced in the technical proposal.

Our proposal is valid for a period of 60 days, after which time we reserve the right to revise the estimate to reflect changed conditions.

We appreciate the opportunity to submit this proposal, and wish to point out that in addition to the specialized capability of the [redacted] [redacted] the full resources of [redacted] will be available to assure successful completion of this program.
